

Ward County, TX Goes Live On Eagle Web!

<http://countygovernmentrecords.com>

What is Eagle Web?

Eagle Web is Tyler Technologies' online public access module. It allows the public to view index information and images from the comfort of their home or office. A brief registration process allows you to access the documents.

When are documents available?

Documents are uploaded to Eagle Web on a nightly basis. Documents are not uploaded until they have been scanned, indexed and verified. This usually occurs within two business days of recording.

What is the cost?

There is no cost to become a registered user and search the index. Images may be purchased for \$1.00 per page.

What do I need?

All images are downloaded in PDF format. You will need a PDF Reader, such as Adobe Reader, to view and print images. Eagle Web can be viewed on most web browsers and Operating Systems. A complete list of minimum requirements is available in the Help section of Eagle Web.
